Technical Information

GAMASTAB

Stabilizer for hydrogen peroxide bleaching.

Gamastab is a good non-silicate stabilizer for alkaline hydrogen peroxide bleaching with soft fabric handle. This also saves costly machinery from scale formation problems

Characteristics:

Physical form	: Colourless Liquid.
Chemical character	: weakly anionic mixture of inorganic salt and dispersing agent
Physical gravity	: 1.04/cm
pH 10g/l	: 6.65
Durability	: good
Stability to hard water	: good
Alkali	: With strong caustic soda initial separation covered with stirring.
Storage stability	: good
Foaming	: nil

Application

Normally 1/10 th of peroxide.

We cannot anticipate all conditions under which this information and our products or the products of other manufacturer in combination with our products may be used.
