Technical Information

GAMASOFT QT

New generation ester based textile softener

Characters strict appearance	:	Freely flowing to thick pour able paste
Chemical Nature	:	Fatty acid ester
Appearance	:	Transparent to opaque
Ionic Nature	:	Cationic
Compatibility	:	To be checked with anomies
PH	:	Acidic

ADVANTAGES

- Concentrated liquid cationic softener
- Saving in transportation and packing
- Quality assurance for the buyer
- Higher active cationic softener content
- Comfortable with all finishing auxiliaries
- Good dispersion property
- Can be blended with other finishing agents in promoters
- Can be diluted and formulated in various strength
- Exhibits good softeners and handle
- Good rewetability and reduced active change
- More importantly – biodegradable
- Unique chemistry – new generations finishing agent
- Exhalent softeners performance vis-à-vis fatty and amides
- Optimization of finishing performance

Usages : 0.1 to 0.5% depending on softness required.
